

DIMENSIONS

1170 mm x 635 mm x 975 mm (with all accessories)

WEIGHT

40 kg

FEATURES

Composition: Plate, square tubes and round steel tubes. Micro textured electrostatic powder coating finish. Polyethylene caps. Ultra High Molecular Weight Polyethylene Plates (UHMW Plastic).

Tube length: 900mm long and 48mm in diameter.

Tube length for discs: 400mm long and 48mm in diameter.

Color: Black. Other colors on request.

Suitable for sliding and non-rough surfaces. Use on grass, both natural and synthetic, is recommended.

Accessories and features:

- Removable central tube for placing bumpers.
- Two tubes and 4 fittings at the ends, for pushing. Easily removable to push back in the opposite direction without turning the sled.
- Wheelbarrow. Horizontal placement of the push bars on one side and on the opposite side, the adapter to place a bumper to make a wheel.
- For the vest. It contains specific holes for attaching the vest to pull the sled.

FINALITY

Linear weight transport from one point to another with push, pull and wheelbarrow movements. Used in strength and conditioning workouts.

MAINTENANCE

The cleaning of magnesium and dirt must be carried out weekly, depending on its use, focusing especially on the application of a lubricating and anti-rust liquid (for example the WD40 spray).

WARRANTY

For final consumers of 2 years.

For business consumers 1 year.

Exclusion of warranty: When misuse is verified. When proper cleaning and maintenance is not carried out as described in the maintenance point. We are not responsible when the laying surface does not meet the requirements for its normal operation.
